

# REDUCE HEATING COSTS and improve your tenants' comfort

## MULTI-RESIDENTIAL or SMALL COMMERCIAL

As an Owner or Property Manager of a Multi-Residential building with hot water heating systems using convectors or radiators; by investing in **Novitherm™ Heat Reflectors** you will reduce heating costs and improve your tenants' comfort.

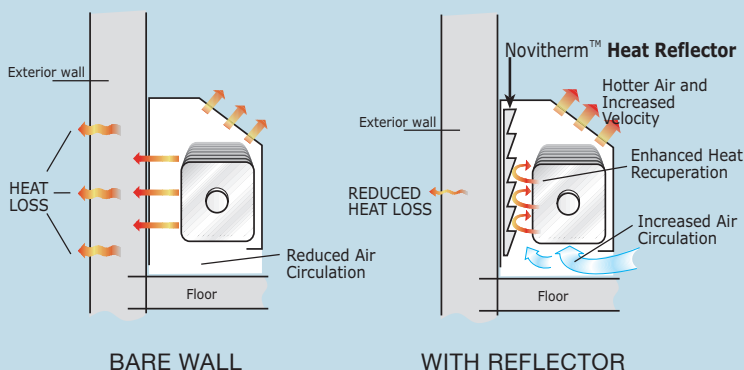

### Novitherm Heat Reflectors have many benefits:

- Reduces conductive heat loss through exterior walls
- Reflects greater than 93% of the radiant heat lost through the exterior wall
- Allows for the reduction of boiler water temperature by 10 degrees or more
- Reduces run time of your heating equipment

- Expect at least 10% savings of your annual heating costs
- Multi-residential clients have a 1- 3 year payback
- Simple return on investment (ROI) of 33% to 100%
- Reduction of greenhouse gases
- Improves tenant comfort by increasing heat output into the apartment

When combined with boiler retrofits and other energy saving measures, installing **Novitherm™ Heat Reflectors** typically shortens overall payback while substantially increasing your return on investment.

**Tenant Comfort + Energy Savings + Carbon Reduction = Novitherm™ Heat Reflectors**
